II.   Agenda

Review NSLDS Routing Identifiers (ID) and their relationships to other Partners responsible for routing schools, and others through the Enterprise.

III.   Outcomes

1. There are numbers known as "NSLDS Numbers". These numbers area are "smart numbers" and the Point of Contact for RID follow-up investigation is Sandra Fowler, of FSA.
2. All processes relevant to NSLDS are signed-up for via SAIG and the answers provided by those signing-up determine designation of NSLDS numbers and other permissions
3. Pam Eliadis identified that there have been "tons" of affiliation-related issues that have been problematic and have had to be deleted from NSLDS
4. If a school is incorrectly closed, and needs to be reopened, there is a way to "delete a COA" (which has been incorrectly entered)
5. State Agencies all receive a TG Number
6. There is a 3 digit code for Guarantee Agencies (GA) and the code starts with a "9"
7. Similar Lender IDs start with an "8"
8. Similar Lender/Servicer IDs start with a "7". Lender IDs are sent from FMS to NSLDS, which then forwards them on to SAIG.
9. Lender Servicer IDs are maintained independently in NSLDS.
10. Schools start with "0-6"
11. Pam said that there are "Still some Pre-PEPS IDs in NSLDS, which are basically OPE IDs generated prior to PEPS"
12. She confirmed that "the OPE ID is NSLDS' Driver" (it is the key among 5 number that NSLDS uses to identify a loan
13. If a user attempts to enter an OPE ID or a Lender ID that is not in NSLDS, they will "error-out"
14. Pam said that one issue with PELL is that "duplicates popped-up in the system"
15. Pam expressed her feeling that for RID to be successful, "it must be truly enterprise-wide"
16. Concern was expressed that the new identifier (RID) would not be 'smart' and thus users could not easily see relationships established.
